

## Homework Program Set Ch 2

Complete these programs on the system and turn them in using the turn in command. These are homework programs and should be completed outside of class. Post any questions on the discussion forum.

Filename: hw2-1.cpp

Write a program that will print your name and a list of your classes. List each class on a separate line.

Filename: hw2-2.cpp

From the Book, Problem 14 on page 83

(Note: do not use your real address and phone number)

Filename: hw2-3.cpp

Write a program that will allow the user to enter the number of questions the answered correctly on a test. Each correct answer is worth 10 points. Print the total number of points. For example, if the user types in 5 your program should print 50, if the user types in 8, your program should print 80.

filename: hw2-4.cpp

A car gets 20 miles per gallon. Write a program that will allow the user to type in the number of gallons, and your program should print the total number of miles. For example, if the user types in 10, your program should print 200. If the user types in 4, your program should print 80.
