

## Homework Program Set Ch 5

Complete these programs on the system and turn them in using the turn in command. These are homework programs and should be completed outside of class. Post any questions on the discussion forum.

Filename: hw5-1.cpp

Read in 3 numbers per line, add the first 2 numbers and subtract the third, print out the original numbers and the new numbers. Your program should use a for loop and work for exactly 11 of lines of data.

Filename: hw5-2.cpp

Read in a list of exactly 15 numbers using a for loop, multiply each number by 25. Print the number and the number multiplied. Your program should use a for loop.

Filename: hw5-3.cpp

From the Book, Problem 1 on page 294

Filename: hw5-4.cpp

From the Book, Problem 3 on page 294
